

# ADVANCED SURVEYING T E C H N O L O G Y

When you learn to use your software more effectively you will

- Complete design tasks in less time with fewer errors.
- Make revisions that take minutes not days because you are using model based technology not dumb CAD entities.
- Learn more efficient design and drafting techniques for:
  - Civil Engineering, Surveying, and GIS
  - CAD Standards and BIM
  - Plan Set Creation
  - Plotting Automation
- Save time and money by working smarter
- Be the preferred choice because you deliver better drawings in less time.

## **How Online Training Works**

Online training will be conducted using GoToMeeting.

The sessions will be 1 to 3 hours in length

One session per day.

A multi-day schedule will be planned. We work with you to create a list of topics for each session.

We provide a recording of each session. You only pay for the information once. This reduces your need for taking detailed notes so you can relax and learn. Replay again and again.

## **For Individuals or Groups the pace is right for you.**

We can go as fast or slow as you need. If you already know it, we can skip it. We only cover what you need to know. Training groups of people allows you to clarify and communicate standards.

## **Topics are relevant to your current work.**

We cover topics that are relevant to the work you are currently performing. You can even complete billable work while training.

## **Scheduling is rarely a problem.**

Scheduling online training is as easy as a phone call. There is no travel required. You don't miss a full day of work. You don't have to leave your office. If you have a scheduling conflict we can easily reschedule a session.

## **How much does it cost?**

We will follow a detailed training plan developed for your specific needs. That plan will include the dollar amount you should plan to invest. We will invoice you after each training event so you can track what we have covered for topics and what we will be covering next.

Buying software is only a part of your investment toward improving your work. You need to know how to use your software more effectively. Start saving time and money. [Contact us now](#) to get started.
